

GENERAL POSTER TIPS

Be clear and concise with design and content. Less is more.

Don't overcrowd the poster.

Embed high-quality graphics and videos.

THINGS TO AVOID

No hyperlinks. Internet access will not be available during your presentation.

Sound is not permitted due to the open area in which posters will be presented.

FORMATTING

We are using 55" LCD displays in the Landscape position.

For best viewing, set your page size to 40.97 inches by 23.04 inches. Or less than 55".

Font size should be a minimum of 32 points. This sample text is 32 points.

Remember contrast. Dark fonts on light backgrounds, light fonts on dark backgrounds. All other combinations are especially difficult to read on-screen.

STATISTICS & EQUATIONS

Make sure equations are large enough to be read from a distance. This example uses 28 point font.

$$(x + a)^n = \sum_{k=0}^n \binom{n}{k} x^k a^{n-k}$$

$$f(x) = a_0 + \sum_{n=1}^{\infty} \left(a_n \cos \frac{n\pi x}{L} + b_n \sin \frac{n\pi x}{L} \right)$$

Leave some empty space between equations for easier reading.

PUT statistics / Graphs as per your need .
USE JPEG format for better visibility.

RESULT / DISCUSSION

Modify your poster as per need .
You can put Result , Discussion , Recommendations, Limitations / strength as per your need
